Introduction

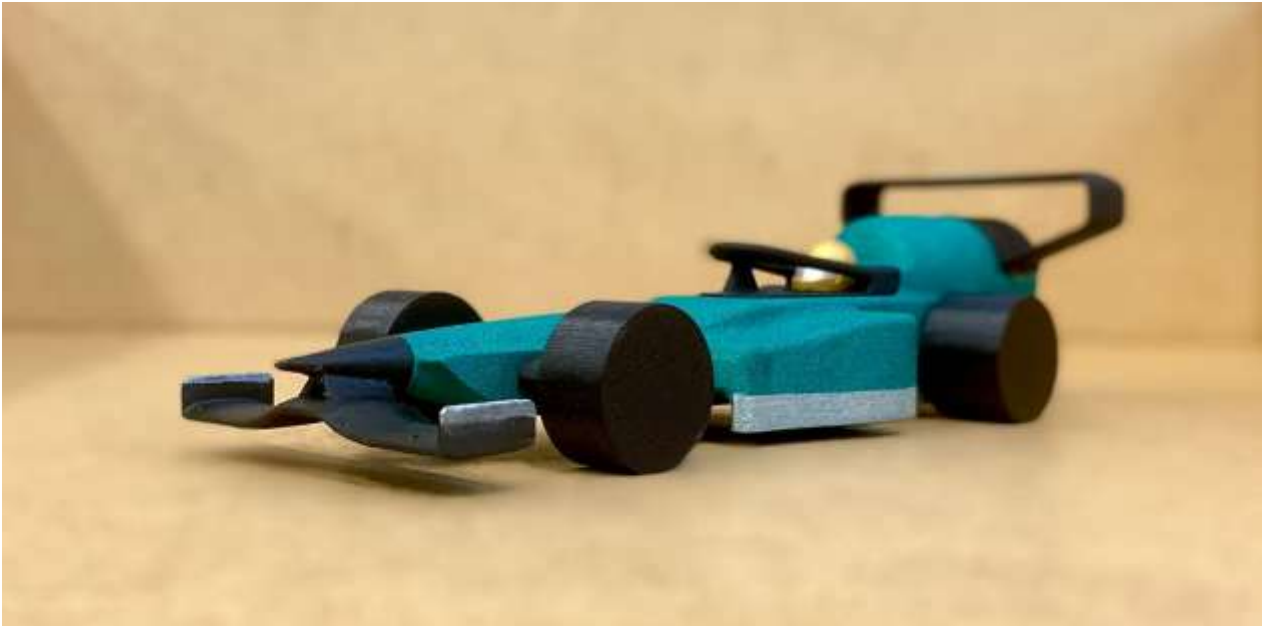

We are Caliber Racing, and we compete in Stem Racing. We are looking for sponsors to support us in our journey.

We will present potential sponsorship packages for you to partner with us helping to advance our future aspirations in stem and boost your brand exposure.

Caliber Racing was formed in 2022. In our first year competing we came last but the following year we came back determined and had the fastest car, but we were penalised for small production discrepancy. In the 24/25 season we had the fastest car in regionals as well as placing 2nd securing us a place at the national finals. At nationals we came 17th out of 32 and had the 5th fastest car in the country.

Introduction

This is an amazing once in a lifetime opportunity and we would love to share this chance with you as we represent your company at the regional final competition, with the chance for us to progress to the national final and even world finals and bring your company to the attention of a national audience.

By partnering with us, you will become an integral part of the Caliber Racing family.

Stem Racing

Stem Racing is a stem-based activity which was formed in 2000. This is a competition where different teams across the globe take part in creating miniature F1 cars. It is a team competition that utilises uses of a vast number of different skills as there are a wide variety of separate roles that are needed for success.

Stem Racing teaches a variety of life skills such as time management, teamwork and financial management. These life skills can be transferred into a variety of future careers which someone who participated in Stem Racing might want to pursue.

The Team

A Stem Racing team consists of a maximum of 6 members and a minimum of 3.

There are 7 common roles within Stem Racing:

- Project Manager
- Car Designer
- Car Manufacturer
- Sponsorship and Marketing
- Social Media Manager
- Graphics Designer
- Research and Development Manager

Within Caliber Racing, we have 6 members each with 1 or 2 roles. Our team consists of:

- Harry - Project Manager & Sponsorship and Finance
- Jacob - Car Designer & Manufacturer
- Maya - Social Media Manager
- Austin - Merchandise & Marketing
- Leonor - Pit display engineer
- Charlotte – Graphics Designer

ROI

Here is an insight of the benefits and return on investment your company receives when sponsoring Caliber Racing.

Brand Exposure

- Social Media

Within our team we use a variety of different social medias to advertise ourselves. Social media also allows us to provide publicity and brand exposure to your company. We provide good coverage with our video's reaching 100s of people, with some going viral and reaching thousands of views. We are looking at improving our content of videos to hit a wider audience

- Merchandise

On competition days and at public events we wear a custom shirts which displays our sponsors and who we are. This helps us build more brand exposure for us and our sponsors.

- Car & Display

At some levels on the hierarchy your logo will be on our car and pit display. Our pit display is visited by many other teams and judges – giving them the opportunity to discover your brand. Our car is also seen during races and at some levels of the competition the races are broadcasted live on YouTube for anyone to see.

Benefits to Students

- Career choices

Stem Racing teaches a variety of skills which are becoming more and more common in jobs across the globe. Some of the key skills learnt are cad and finances. Stem Racing shows students' real-life experiences in a safe, controlled manner.

- Social Skills

Working in a team under stressful conditions often leads to arguments and disputes within the team. This therefore helps students develop strong communication skills, time management skills, leadership, presentation, problem-solving and teamwork.

Sponsorship

Sponsorship is an agreement where a company provides financial or other support to an event, team, or organization in exchange for marketing exposure and opportunities to enhance brand awareness. Recently we have created a sponsorship hierarchy to help sponsors understand the benefits of sponsoring us:

- **Caliber sponsor - £300+**

Our most exclusive and visible package. As a Caliber sponsor, your brand will receive top tier placement and maximum exposure across all our event and marketing channels.

- **Silver sponsor - £150-299**

Perfect for smaller brands or local businesses looking to connect with our audience

- **Racing Green sponsor - £50-149**

A great way for smaller businesses or first-time partners to get involved and gain exposure without a major investment.

Project Sponsor

We are offering a fantastic opportunity for one major sponsor to support our STEM racing project over the next five years.

We are seeking a company to sponsor the entire project, which includes our five current teams as well as any new teams formed through to 2030. We are aiming to raise £10,000 to fund essential equipment needed to sustain and advance the project.

This funding will be used to purchase:

- A **Race System Package – Halo Deceleration** from **Denford**, allowing us to practice and test cars for future competitions.
- A **CNC router** to manufacture our cars and quickly prototype new ideas, reducing delays from external production which can take several weeks.

Any remaining funds will be invested in a **scale-model wind tunnel**, enabling us to test and improve the aerodynamics of our cars.

These key pieces of equipment will elevate the quality of our work and greatly enhance the learning opportunities for students involved in the program.

As our major sponsor, you will receive:

- The **top sponsorship package** for each team, every year, for the next five years.
- **Brand exposure** through press releases and project communications.
- A **demonstration** of the equipment in use at the school.

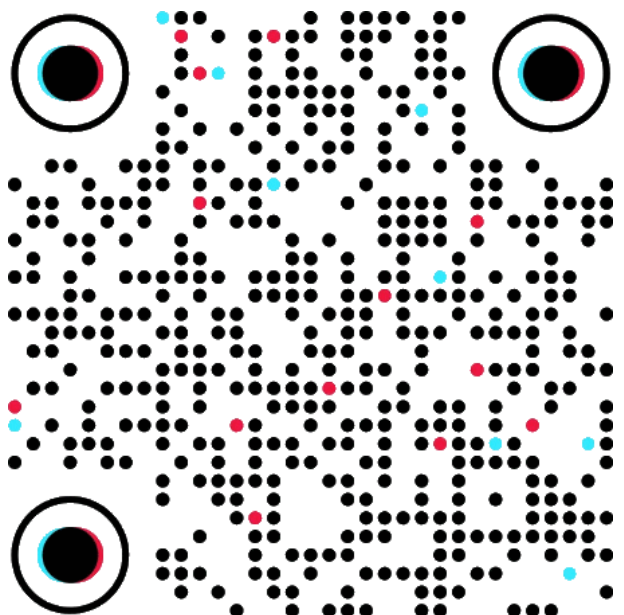

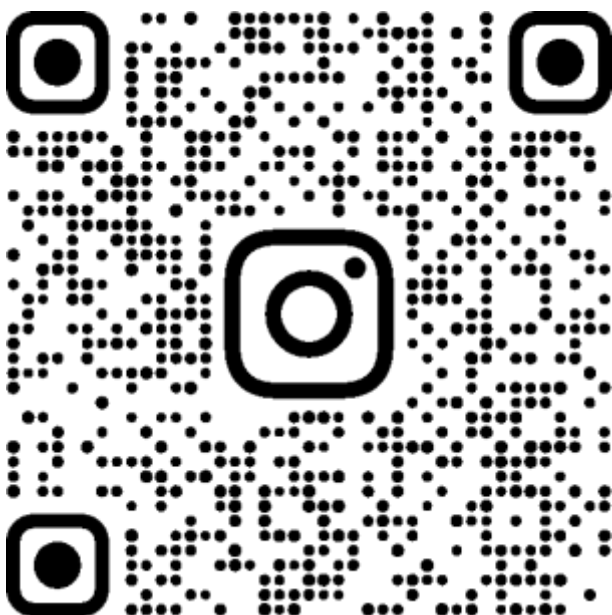

Media

We have gathered a greater following on social media over the last year with most of this being down to the success of the team and experimenting with different types of media to capture audience attention.

We have grown our Instagram following by over 100% in the last 6 months with more engagement and also by documenting our progress from competing in the regional competition to our two days at national finals, including the race in which our car posted the 5th fastest time in the UK.

If you would like to check out our socials. Below are QR codes that will take you too our tik Tok and Instagram pages.

These are our main platforms for social media as they are two of the largest platforms used across the world. They also are perfect for short form content which is most engaging to our current audience and other potential followers.

Contact Us

If you are interested in sponsoring the team then, either:

- Contact us via our socials
(on previous page)
- Email us at:
caliberracing2022@gmail.com
- Send a letter to:
